

Forsman, Inc.

I would like to take a minute and introduce you to Forsman, Inc. (FI), a privately owned S-Corporation headquartered in Las Vegas, Nevada. FI is a Native-American Indian-owned firm with 8(a) and small disadvantaged business (SDB) certification, and U.S. Department of Transportation Disadvantaged Business Enterprise (DBE) certification in Nevada and Arizona.

Forsman, Inc. conducts business through the following five operational units:

- ♦ Horizon Surveys - Las Vegas Nevada
- ♦ Horizon Consultants of Arizona - Phoenix, Arizona
- ♦ AeroTech Mapping Technologies – Phoenix, Arizona
- ♦ Cobalt Contractors – Las Vegas, Nevada
- ♦ Horizon Engineering – Las Vegas, Nevada

The company is focused on the provision of specialty trades and services related to the construction industry. Since 1993, we have provided full-service land and aerial surveying, as well as other related services including:

- | | |
|-----------------------------|--------------------------|
| ♦ Land Surveying | ♦ General Construction |
| ♦ Aerial Photogrammetry | ♦ Specialty Concrete |
| ♦ GPS Surveys | ♦ Construction As-Builts |
| ♦ High-Definition Surveys | ♦ Construction Staking |
| ♦ Land Title Surveys (ALTA) | ♦ Water Rights Surveys |
| ♦ Mapping | ♦ Rights-of-Way |

FI's staff of over 57 includes 11 Professional Land Surveyors, a nationally-certified Aerial Photogrammetrist, and other personnel with extensive construction experience. FI's equipment is state-of-the-art and its technicians are trained in the latest methods and technologies which provides flexibility in satisfying its client's needs. FI is one of the few firms in the nation with the equipment and expertise necessary to provide the latest in measurement technologies, 3-D High Definition Surveying (HDS). The HDS system allows FI to offer its clients 3-D images of terrain, infrastructure, and completed structures. This technology not only provides survey data and as-built drawings, the final images are legally permissible evidence. Combining this advanced technology with its conventional topographic survey and mapping capabilities, FI is able to provide its clients with survey and construction services to meet your project-specific requirements.

Should you require any additional information or like to discuss the possibility of FI supporting your current or future projects please contact me at (702) 228-5066.

John E. Forsman, P.L.S.
President
